## Roomba® Vacuuming Robot

The iRobot® Roomba® 800 Series removes up to 50% more\* dust, debris and hair from your floors by eliminating traditional bristle brushes, instead using AeroForce® Extractors that offer even better performance and are virtually maintenance-free.

### SMART

iAdapt® Navigation enables Roomba® to vacuum an entire room, cleaning under furniture, around obstacles, and along wall edges.

- At just 3.6" (9.2 cm) tall, Roomba has been specifically designed to fit under most furniture and kickboards, so dirt has no place to hide.
- Cliff detect sensors allow Roomba to avoid stairs and other dangerous drop-offs.
- Roomba uses optical and acoustic sensors to detect high concentrations of dirt, dust and pet hair, and then performs focused cleaning where it's needed most.
- Select models include our Virtual Wall® Lighthouse™ which keeps your Roomba cleaning in one room, then sends it off to tackle the next room.

### SIMPLE

Brushless extractors help prevent tangles and jams caused by hair and other debris, making it even easier to tackle the daily build-up of dust and dirt.

- With just the press of a button, Roomba gets to work with no programming required.
- Roomba automatically adjusts to clean carpets, tile, hardwood and laminate floors as it moves through your home.
- Roomba is always ready to clean because it automatically returns to its Home Base® between cleanings to recharge.
- Roomba can be preset to vacuum up to seven times per week meaning your home can stay clean every day.
- Roomba has an indicator to let you know when the bin is getting full and needs to be emptied.

### CLEAN

The AeroForce® 3-Stage Cleaning System delivers up to 50% more cleaning performance\* using a balance of debris extraction and suction power.

- Dual counter-rotating extractors incorporate a durable rubber tread design that grabs dirt from any floor type while reducing hair tangles and brush maintenance.
- Spinning side brush pushes debris into the path of the 3-Stage Cleaning System making Roomba adept at sweeping dirt from wall edges.
- AeroForce® High-Efficiency Filter captures 99% of allergens, pollen, and particles as small as 10 microns.

\*Compared to Roomba® 600 and 700 series AeroVac™ systems
