

New iRobot® Braava jet™ Mopping Robot automatically cleans based on your needs

The Braava jet™ mopping robot is designed to clean hard floor surfaces with high amounts of traffic, like kitchens and bathrooms. Attach the desired cleaning pad and just press “CLEAN.” Based on pad type, the robot will automatically select wet mopping, damp sweeping, or dry sweeping cleaning mode, and get to work.

SMART

Compact design and seamless navigation help Braava jet clean floors thoroughly, even in hard-to-reach – and sometimes unsavory – places.

- Braava jet™ uses iAdapt® 2.0 Navigation to map and track where it's been to clean floors up to 250 ft²/25 m² in damp/dry mode and 200 ft²/20 m² in wet mode¹
- Braava jet mops and sweeps kitchens, bathrooms, and other small spaces in an efficient, systematic cleaning pattern
- With its square shape and compact size, Braava jet gets into hard-to-reach places, including under and around toilets, into corners, and below cabinets
- Braava jet remembers obstacles in its path and slows down to gently clean along furniture, walls, and fixtures
- Avoids stairs and riding up on rugs

SIMPLE

Braava jet automatically cleans based on a user's specific needs – simply attach the desired Braava jet™ Cleaning Pad and just press CLEAN.

- Braava jet automatically selects the correct cleaning mode based on pad type
 - » **Wet Mopping** – Triple-pass cleaning for dirt and stains on well-sealed floors, such as hardwood, tile and stone
 - » **Damp Sweeping** – Double-pass cleaning for everyday dirt and dust on sealed wood floors, tile and stone
 - » **Dry Sweeping** – Single-pass cleaning for dirt, dust and pet hair on all hard floors, including hardwood, tile and stone
- Available for Android and iOS devices, the iRobot HOME App allows users to access the CLEAN button to start or stop Braava jet, use Spot Clean for a quick, deeper clean, easily get software updates and directly access customer service
- Users never have to touch the dirty cleaning pads with the easy Pad Eject button – simply press the button and the pad falls into the trash
- To keep Braava jet from entering unwanted areas, such as rooms without a door, users can create an invisible boundary with Virtual Wall® Mode

CLEAN

Braava jet gets to work using its Precision Jet Spray and Vibrating Cleaning Head to loosen dirt and stains² while Braava jet pads break up and lock away debris.

- Targeted spray tackles dirt and stains³
- Braava jet searches for obstacles in its path before it sprays to help keep furniture, rugs, and walls dry³
- Vibrating Cleaning Head gently scrubs dirt and stains⁴
- Designed to mop and sweep hard floors including hardwood, tile and stone

Braava jet™
Mopping Robot 

¹Based on a room with 25% of the floor occupied by objects, furniture and rugs

²Tested in wet mode on dried coffee and soda

³Precision Jet Spray used only in Wet Mopping and Damp Sweeping modes

⁴Vibrating Cleaning Head used only in Wet Mopping and Damp Sweeping modes
